## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the supporting members forming an elliptical or a substantially circular shape must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Acinar.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3636

5. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aginar. Acinar shows all of the teachings of the claimed invention except each rib unit made from metal or plastic. It would have been an obvious matter of design choice to modify each rib unit from either metal or plastic, since applicant has not disclosed that a metal or plastic rib solves any stated problem and it appears that the rib, as taught by Acinar, would perform equally well.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference No. 3,743,353 shows another composite furniture component.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony D. Barfield whose telephone number is (703) 308-2158.
